The Most Dependable Source of FCCU Equipment For Over Thirty Years

Simply The Best in FCCU Manufacturing

<http://tapcoenpro.cwfc.com>

TapcoEnpro manufactures fabricated components for Refining and Petrochemical process units. All products can be manufactured to accommodate cold shell or hot shell design installation with any type of refractory or hard surfacing.

We have the capacity and capabilities to perform all manufacturing steps in-house.

Some of our in-house capabilities include: fabrication, machining, refractory installation, heat-treating, testing and assembly. This gives us strict control over quality, production scheduling and on-time delivery.

We also provide in-house materials testing including destructive and non-destructive tests such as on-site radiographic, magnetic particle,

ultrasonic, dye penetrate, hardness and visual dimensional tests. Complete test results, including metallurgical reports and heat treating certification, are provided.

Few manufacturers can provide FCCU reactors, regenerator vessels and third stage separators with internals installed, insulation & external coatings plus all attachments, such as platforms, complete at time of shipment.

TapcoEnpro maintains the following certifications from the ASME and the National Board of Boiler & Pressure Vessel Inspectors:

- "U" Stamp, Division 1
- "U" Stamp, Division 2
- "S" Stamp
- "R" Stamp
- "PP" Stamp
- National Board Registration

Our full line of FCCU Equipment includes:

- Regenerator/Reactor Heads
- Air Distributors
- Catalyst Hoppers
- J-Bends/U-Bends
- Regenerator Standpipes
- Regenerator Riser Lines
- Feed Nozzles
- Catalyst Coolers
- Regenerated Cyclones
- Reactor Standpipes
- Overhead Vapor Lines
- Reactor Vessels
- Seal Pots
- Reactor Strippers
- Overhead Transfer Lines
- Wye Sections
- Reactor Riser Lines
- Steam Rings
- Plenums
- Inlet/Outlet Nozzles
- Reactor Cyclones
- Critical Feed Nozzles
- Insert Pads & Manways
- Pressure Piping
