Our Experience and Knowledge Is On-Call When You Need Emergency Response

We Help You Minimize Downtime and Maintain Plant Efficiency

<http://tapcoenpro.cwfc.com>

When you are responsible for the maintenance and operation of flow control equipment for your refinery or processing facility, you need technical expertise you can rely upon. Nothing makes better sense than to trust your assets to the original inventors of the world's most respected valve and control system... TapcoEnpro.

Our valve service division handles the needs of customers throughout the world with the ability and knowledge to perform a complete valve overhaul in the field... always with an emphasis on safety, quality and on time completion. Our expertise includes FCC Slide and Plug Valves, Flue Gas Butterfly

Valves, Flue Gas Isolation Valves, Wedge Plug Valves and many other styles manufactured from sources throughout the world.

Our international capabilities enable us to respond to emergencies any time, day or night. We can provide either supervision to direct your on-site contractor or provide complete equipment and personnel to tear down, inspect, repair, assemble and test valves in the field and in-line. And, with our worldwide plant locations and their personnel available 24 hours per day seven days a week, there is no shortage of shop support if field repair is not practical.

Certified by

We know how financially disastrous any downtime can be so our Field Service Teams, based in Houston and the United Kingdom, along with full-time support technicians in India and Japan, we can respond to on-site assistance within hours anywhere in the world.

Our skilled personnel are well trained and highly experienced to provide the depth of expertise you need on site. A TapcoEnpro field service representative brings with him more than 50 years of valve design and maintenance experience so you always have the best technical knowledge available in the industry.

Our technical personnel will visit your plant prior to shutdown to meet with your refinery turnaround planners to analyze your operational data, review any maintenance problems since your last shutdown and inspect your spare parts and valves to determine what will be needed to ensure a successful turnaround. Based on the information received during this visit, we will also evaluate the last repair and make any necessary recommendations to further extend the life of your valves.

When you choose the world's most respected valve manufacturer, you are buying the finest support in the industry as well. At TapcoEnpro, our commitment to preventative maintenance begins with the installation of your TapcoEnpro valve when we train your personnel on your site to properly care for the valve and control system. A continuing education program is the hallmark of a long-term partnership between you and TapcoEnpro.
